Cory;

Just wanted to drop a line to say thanks for the great service. As always when we have any questions you are there with the answers and we do appreciate that. However, I was very impressed when I opened our last 2 orders and found that Listen had already unpacked the receivers, loaded the batteries, and placed them in the case. Normally what you expect is to have a big box full of smaller boxes that you need to check to make sure you got them all, unbox each item, and assembly as needed. I appreciate the high level of customer service and look forward to more opportunities to enjoy it.

Thanks,

Mike Dewees
