## Corporate

### The Gideons International

#### Digital IR • Language Interpretation • Assistive Listening

- The oldest Christian business in the US placing and distributing more than 63,000,000 Scriptures worldwide needs multiple channels for language interpretation to conduct business meetings.
- Digital IR system offers up to 32 channels for language interpretation - ideal for large or small meetings.

## Education

### University of Wyoming

#### Stationary IR • Assistive Listening

- Large campus building with multiple classrooms in close proximity of one another - needs to deliver audio with no signal interference.
- Students enjoy clear audio signal from outstanding performance of the Stationary IR system.
- Up to four channels mono or four channels stereo makes it easy to program the audio for the application.

## Entertainment/ Athletics

### Hult Center for the Performing Arts

#### Stationary IR • Assistive Listening

- Multi-purpose arts facility in Eugene, Oregon looking to update to a quality audio system for assistive and descriptive listening.
- AGI and Pros, Inc.'s on site demonstration of Stationary IR system showcases ease of use and excellent audio quality.
- Outstanding performance ensures crystal clear audio for arts patrons.
- Audio signal does not leave the room - eliminating copywrite infringement of artistic programming.

## Hospitality

### Menachem Begin Heritage Museum

#### Stationary IR • Assistive Listening • Language Interpretation

- Museum exhibit inspired by the life of Menachem Begin uses pictures, film, lighting, and a multi-lingual sound track in ten exhibit areas to tell the story to 350 - 400 international visitors per day.
- Stationary IR system is ideal for transmitting audio in multiple rooms on multiple channels with no interference between channels.
- Higher modulation frequencies decreases the risk of light interference from the exhibit's lighting.
