Dear Jody and Listen Technologies:

I just wanted to take a moment to thank you for the transmitter and receiver you so graciously donated to my students and I. We have been using the system for a therapy technique we call *auditory bombardment*. I pick several words that contain a sound that the student is having difficulty saying (e.g., /k/ at the ends of words) and say them into the transmitter while the child listens with the receiver and headphones. Being able to amplify the volume really improves the quality of the auditory bombardment because it helps the child hear better and focus more on what he/she is hearing. It is very motivating for the students as well. My students' speech instantly improved with the use of this device! I knew it would help, but I did not think I would see improvements so quickly. It has been a welcome surprise. Enclosed you will find a thank you card from my preschool students who have been using the system. I use it with several students every day. Again, my sincerest thanks.

Sincerely,

Linda
