THE RECEIVER REVOLUTION

Half the Size. Twice the Experience.

Listen Technologies' receivers are revolutionizing assistive listening by providing the best experience for venues and the people who use them.

Designed to deliver higher quality audio with 20 dB less hiss than other receivers

Integrated Neck Loop/Lanyard provides better audio for people with cochlear implants and telecoils

Streamlined for better management with smarter and simpler maintenance solutions

Upgraded battery technology saves money over time and the hassle of battery management and disposal

Half the size and half the weight of other assistive listening devices making them easier to hand-out, store, wear, and use
