

ARE YOU IN THE LOOP?

Join Listen Technologies for Hearing Loop Level 2 Training

Tuesday,
June 11th, 2019
8:00 am - 5:00 pm
Lunch will be served

Courtyard International Drive
8600 Austrian Court Orlando,
FL 32819

Hearing Loops are growing in popularity across North America because they give users discreet, personalized, and positive listening experiences, without requiring the user carry additional equipment. Learning to install hearing loops gives you a greater understanding of important standards and various design considerations. Listen Technologies offers a Hearing Loop Level 2 Training Course*, which will not only help you build your skillset, but your business, as well.

This course includes:

- Hearing loop system principles
- Specification and design considerations of different loop systems (basic, advanced, and phased-array)
- International performance standards, IEC60118-4
- Introduction to Loopworks, a suite of tools to help improve the process for bidding and installing hearing loops
- Various types of test equipment

To register, visit www.listentech.com/training or call **1.800.330.0891**

*Full day workshop (8 hours) and (1) Metal Loss Test Kit for \$995.00 per person; lunch is provided. Note, attendees must participate in the level 1 training webinar prior to attending the Hearing Loop Level 2 course. Visit the training page on our website for more information.
