

# Navilution Wi-Fi

THE SMART SOLUTION FOR WIRELESS  
AUDIO ON PASSENGER VESSELS

## THE EVOLUTION OF

passenger experience with a completely mobile Wi-Fi solution

Navilution® Wi-Fi is the world's first complete GPS triggered multilingual content & onboard commentary delivery solution for ferries and cruise vessels. No internet required, and free of wires and retrofit installations. Our free QR code and Listen EVERYWHERE app make it easy!

### Incredible Multi-language Experiences

Our total solution provides unparalleled sound quality and reliability with creative and translation services that break down language barriers. Deliver unforgettable experiences for up to 1,000 passengers, right to their own phones and other smart devices.

Navilution Wi-Fi with Listen EVERYWHERE makes it simple and cost-effective to deliver multi-language, assistive listening and multiple location/channel audio delivery – whatever your vessel, vehicle or venue.

- Stream through your existing wireless network
- Ultra-low latency
- No internet required
- Simply scan QR code for easy and fast download of your Listen Everywhere app

### Smart Phone Integration

Simple, affordable, and seamless wireless listening. Your passengers use their own device (BYOD), allowing them to fully enjoy the experience while you avoid the hassle and cost of distributing and collecting equipment.

## Cinematic, Multi-channel Audio Delivered Right to Your Passengers Own Smart Devices

Provide engaging multi-language information, promotions, and tours to increase ridership and boost reliability and safety.

Your passengers' enjoy complete mobility as GPS-triggered audio is streamed from your Navilution Wi-Fi system.

## Simple User Interface

Scan QR code for easy and fast download of your Listen EVERYWHERE tour app

Connect to the wireless internet

Choose your desired channel

# NAVILUTION

### Easy Installation Using Existing Infrastructure

With existing Wi-Fi, your guests can enjoy multi-language streaming and automated storytelling with no broadcast or spectrum issues.

### Control the Entire Passenger Experience

A combination of GPS automated commentary and manually triggered content segments allow you complete control of the passenger experience on and off route.

### Hassle-Free Content and App Management

Worry-free cloud-based management, customization, responsiveness, and support. Diagnostics and upgrades are seamless, ensuring your guests have the best experience.

### One Solution, Hundreds of Users

Support hundreds of simultaneous users while offering up to 16 audio channels.

### Leading Triggering Capability

Advanced GPS system and cortex programming allow unmatched accuracy for triggering events.

### PA System Support

The simple, single-touch language channel assignment feature saves time when working with a PA system.

## CUSTOMIZABLE IN-APP FEATURES

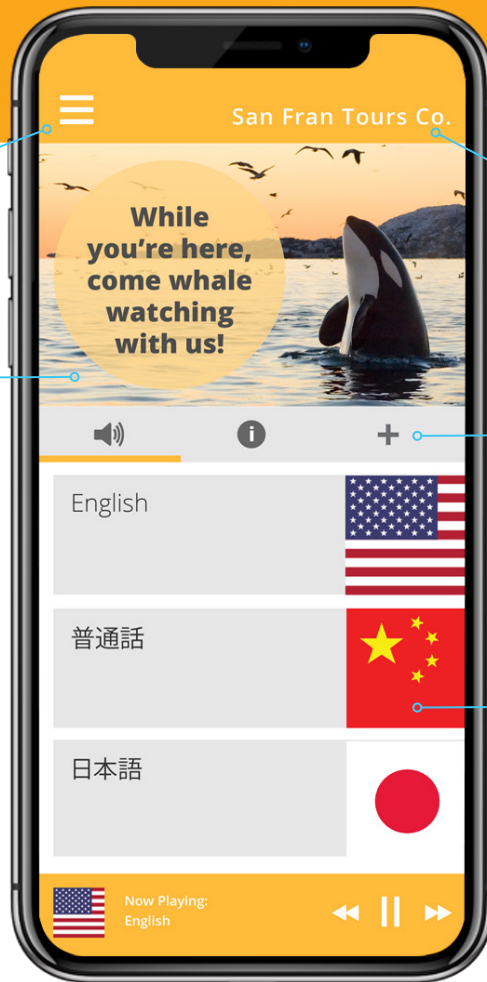

Navilution Wi-Fi and the Listen EVERYWHERE app allow you to fully customize and brand your system.

### Text Banners

Text banners allow you to insert updated content quickly and easily.

### Sliding Promotional Banners

Upload ads, coupons, promotions, or special events banners that can click through to other tours, websites or additional information.

### Welcome Ad or Video

The first thing customers see when opening the app: set the number of seconds before your welcome ad or video can be skipped.

### Custom Content

Link to websites, event agendas, PDFs and any other custom content.

### Custom Labels for Channels

Channel logos and other graphics make easy for guests to find their desired channel.
