

OVERVIEW

Product: ListenRF

Location: Las Vegas, NV and Orlando, FL

InfoComm's AV Technology Tours visit technical and entertainment venues, offering a behind-the-scenes look at how leading edge AV technology has been implemented. Tour participants have the opportunity to hear from the experts that operate these venues and gain an understanding of real world applications of the technologies being exhibited on the InfoComm show floor.

To ensure that attendees are able to hear clearly and engage more fully, the InfoComm AV Technology tours provide Listen Technologies portable RF products. This solution is compact, easy to setup and use, and provides attendees with an exceptional listening experience.

The Listen LT-700 Portable RF transmitter wirelessly broadcasts audio to everyone in the group without the leader having to carry a separate microphone. The LR-4200/5200 iDSP receivers are half the size and weight of competitive products and include Listen Technologies' unique DSP SQTM noise reduction technology ensuring users have the best listening experience. The LT-700 along with the LR-5200 is ideal for all types of group tours including factories, outdoor events, stage productions, campuses; anywhere there is a need to amplify sound, without an installed system.

System Components:

- LT-700-072 Portable Display RF Transmitter
- LPT-A210 Lightweight Behind-the-Head Microphone
- LR-5200-072 Advanced Intelligent DSP Receiver
- LA-430 Intelligent Ear Phone/Neck Loop Lanyard
- LA-401 Universal Ear Speaker
- LA-380 Intelligent 12-Unit Charging/Carrying Case

“

With multiple groups of up to ninety people, the noisy, dynamic environment makes it a challenge to keep everyone together as well as making sure our guests can hear the tour guide.

InfoComm International

ABOUT

InfoComm International's annual event attracts more than 30,000 attendees each year; the largest trade show in North America for the AV Industry. As part of the event each year, attendees can sign up to participate in an offsite AV Technology Tour. In the past, attendees have had the opportunity to get a behind-the-scenes preview of a renowned Vegas or Disney Orlando stage production or an impressive look at the technology that powers the penthouse suites at The Cosmopolitan.
