

GERMAN FOOTBALL MUSEUM DORTMUND

Description:

For public and private guided tours the German Football Museum relies on the fully flexible ListenTALK personal tour guide system. It offers the best speech intelligibility and is suitable for different group sizes. Thanks to intelligent multi-channel capability parallel tours are also possible. Individual participants can be combined to form new groups or even change within groups. The system is interactive and allows queries during guided tours. Reliable operation even for 2-hour tours is a matter of course.

Products:

70 Listen "Talk" receivers of LK-I are used with the LA-405 two-ear headphones or if required, the LA-452 headset for enquiries. The pockets are charged and stored in the LA-480 tabletop charging station.
